Tertiary consumers

Whales

- Top predators

Secondary consumers

Crustaceans (krill, shrimp) and small fish

- Animals that live in aquatic environments
- Ingest zooplankton (as source of energy)

Primary consumers

Zooplankton

- Microscopic animals in aquatic environments
- Ingest phytoplankton (as source of energy)

Primary producers

Phytoplankton

- Microscopic plants/algae that live in aquatic environments
- Use sunlight to photosynthesise and produce energy
