

# Resources for the Junior Cycle SPHE Short Course

Visit [curriculumonline.ie](http://curriculumonline.ie) for the newly developed  
[NCCA Curriculum Online SPHE/RSE Toolkit](#):

When you click on the [NCCA Curriculum Online SPHE/RSE Toolkit](#) button, you will see this image:

# Resources for the Junior Cycle SPHE Short Course

Click the [Resources for Teaching and Learning](#) button to view the NCCA Curriculum Online resources for teaching and learning in SPHE/RSE page as follows:

On the [NCCA Curriculum Online Resources for learning and teaching in SPHE/RSE](#) page, you will see the four strands of the SPHE short course (see image above), with a dropdown menu for each.

Within each of these dropdown menus, there are references to the SPHE Short Course learning outcomes, and live links to suggested relevant and connected activities, documents, Youtube clips, teacher and parent notes and ideas, and other resources from a wide range of providers.

*Note, 'These resources have been selected because they were developed for this age group by a State agency or organisation with a proven educational track record in the area of SPHE/RSE'.*

It is also explained that these lists of materials are not prescriptive, and that each teacher/school/class will decide the appropriateness of each resource in order to discern what is best suited to students' needs, stage of development and school context.

More SPHE resources will be developed in due course.
